

INTRODUCTION

Please read as written.

International Speaker and Violinist, Diane Allen, is a TEDx Speaker and Thought Leader, who speaks on increasing the meaning, joy and fulfillment in work and life by accessing the flow state.

Years before neuroscientists discovered the positive impact flow has on achieving peak performance, Diane had already experienced the power of flow in her own career as a violinist.

It was her unique approach to getting into flow on demand, that landed her a spot on the TEDxNaperville stage as well as features on TED, ABC, CBS, NBC, FOX, Associated Press, The Boston Herald, Authority Magazine, and Thrive Global.

Diane's philosophy is that everyone can achieve their highest potential by getting into their flow state. She believes that not only does being in flow bring out the best in each of us, but that it's key to living a meaningful and fulfilling life.

So, get ready to unlock your flow, Be In Your Genius, and LOVE WHAT YOU DO!

With her Copper Dragon Violin, please, help me welcome, Diane Allen!
